Professional Summary

Aspiring and passionate Flutter Developer with a strong foundation in mobile app development, UI/UX design, Dart, Firebase, and REST API integration. Seeking an opportunity to apply my skills in building scalable, cross-platform applications that deliver seamless user experiences, while continuously learning and contributing to the success of the organization.

Technical Skills

IDE: Android Studio, VS Code, Git & GitHub

Language: Python, Dart, C++, PHP, HTML, CSS

Database: SQLite, Firebase Firestore, Realtime Database

State Management (Flutter): Provider, GetX

Framework: Flutter, Django

APIs & Web Services: REST API, JSON, Firebase Cloud Functions

Education

Graduate in Computer Science

School Of Technology And Applied Science   **March 2025**

Professional Experience
Software Developer Intern

SMECLABS, Kaloor, Ernakulam

- Built and deployed scalable mobile applications using Flutter for Android and iOS.

- Developed responsive and visually appealing UIs using Flutter Widgets, Material Design, and custom components.

- Implemented state management solutions such as Provider, GetX, and Bloc for efficient data flow and app architecture.

- Integrated RESTful APIs and handled real-time data with JSON, HTTP, and Firebase Cloud Firestore.

- Implemented authentication and user security using Firebase Authentication and role-based access workflows.

- Utilized Google Maps API, Geolocator, and other plugins for location-based features and device services.

- Managed local data storage using SharedPreferences and SQLite for offline-first functionality.

- Followed clean code principles, modular coding practices, and Git version control for collaborative development.

Projects

Project 1: Fresh – Grocery Shopping

- FreshMart most convenient online grocery channel

- FreshMart Fresh and Smart makes your grocery shopping even simpler. No more hassles of sweating it out in crowded markets, grocery shops & supermarkets - now shop from the comfort of your home; office, or on the move.

- We offer you the convenience of shopping for everything that you need for your home be it fresh fruits & vegetables, rice, dals, oil, packaged food, dairy item, frozen, pet food, household cleaning items & personal care products from a single virtual store.

- Designed a **clean and modern UI** ensuring smooth user experience with intuitive navigation.

- Ensuring Applications are Compatible of Multiple Platform.

- Providing Support and Maintenance for Applications.

Projects

Project 2: Foodie – Online Food Delivery

Foodie is a user-friendly mobile application built for seamless online food browsing and ordering using **Flutter** and **Dart**.

• Integrated **dummy REST APIs** to fetch menu items, pricing, and product details for demo and testing purposes.

• Implemented **Firebase Authentication** for secure user login, signup, and account handling.

• Used **GetX** for state management, navigation, and efficient app performance.

• Designed a **clean and modern UI** ensuring smooth user experience with intuitive navigation.

• Enabled users to browse food categories, view dish details, add items to cart, and place orders quickly.

• Focused on **responsive layouts** for compatibility across multiple devices and screen sizes.

• Ensured code reusability, modular structure, and maintainability for continuous improvement.

Certification

- Flutter Developer Certification
